### RESUME

At the moment I find myself in a career transition, from the industrial sector to the programming area.

I have dedicated myself to learning web development, carrying out projects using the technologies mentioned above.

My goal by the end of 2023 is to complete training as a Full Stack developer. I am excited by the prospect of an opportunity to apply my knowledge in practice, grow professionally and contribute significantly to the success of the team and the organization.

### PROFESSIONAL HISTORY

#### • FRONT-END DEVELOPER

Freelance | May 2023 - present

Development of web pages and landing pages using technologies: HTML5, CSS3 and JavaScript, applying responsiveness techniques to adapt content to different types and sizes of devices.

Main projects executed:

Creation of landing page for handmade pasta trade. HTML5, CSS3 and JavaScript technologies were used and responsiveness methods were applied to change content between devices.

#### • TECHNOLOGIST IN INDUSTRIAL AUTOMATION

Eletrô Beltrão Automação Industrial | July 2021 - present

Development and execution of automation projects in production lines, aiming at increasing productivity and process reliability.

### FORMATION

#### • FULL STACK DEVELOPMENT

DevClub | April 2023 - December 2023

So far within the studies at DevClub I have been able to learn and develop projects using HTML5, CSS3, JavaScript and project versioning using Git/GitHub.

I am currently addressing or will address the technologies: Node, React, React Native and relational and non-relational database.

#### • MECHATRONICS TECHNICIAN

PUC PR | February 2011 - December 2013

Training aimed at industry, with the following objectives: automation of machines and processes and development of mechanical, electrical, electronic and pneumatic technologies.
